

We are the Polish design & build Company that is present on the Polish and European market since 1989.

We specialize in :

- Ventilation,
- Air-conditioning,
  - Chilled water installations
  - Freon based installations
- Refrigeration,
- Heating,
- Gas and special installations.

We design and build installations for :

- Industrial facilities;
- Commercial buildings ;
- Premium domestic buildings (villas, mansions, residences).

We also implement full Building Management System (BMS) with completion of proper electric systems required for BMS ,as well as, complex pool systems and saunas.

Each of our realisation stands out with individual approach towards Client and focuses on cooperation of all systems that we are implementing.

In all of our realisations we offer complex services of: design, completion of deliveries and selection of proper executive staff.

List of our realisations ,for example, contains :

- **Over 2.000 m<sup>2</sup> mansion, St. Tropez, France**  
Ventilation, Air-Conditioning, BMS, Pool and gas systems.
